

GET INJECTED

Looking for dependability? Our Remanufactured Fuel Injectors exceed OE standards because they're Remanufactured using Advanced Remanufactured Technologies surpassing OEM processes. Our Remanufactured Fuel Injectors are built with the most extreme climate, and harshest conditions in mind. Whether it be Extreme Cold, Hot, Dirty or Wet, Python Fuel Injectors have been remanufactured to withstand the test of time. Purchase and install with confidence once and keep on driving!

Python Fuel Injectors Deliver Confidence!

ADVANCED REMANUFACTURING TECHNOLOGY

All O-Rings, bushings and spacers are 100% NEW.

A fine-mesh strainer is used to protect against fuel contaminants.

Electromagnetic Coil is encased in Kapton or molded to protect against electrical leaching.

Pintle and Pintle Seats are matched and blueprinted to increase the fuel flow rate and atomization cycle.

All flow rates exceed OEM specifications.

Spray pattern is examined at varying engine speeds to assure optimum fuel atomization.
